IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: et al. Waldbauer, Dirk et al.

Int'l Filing Date: 07 November 2003

Serial No.: 10/534,096 Group Art Unit: 3663

Filed: 3/17/2006 Examiner: Mancho, Ronnie

For: METHOD AND DEVICE FOR STABILIZING A CAR-TRAILER
COMBINATION

Attorney Docket No.: AP10564

Mail Stop PCT
Commissioner for Patents
PO Box 1450
Alexandria, Virginia 22313-1450

ELECTION

The Applicants elect with traverse Group I, claims 18-33, a method for stabilizing a car-trailer combination and species A. The Applicants believe that species A corresponds to claims 18-33.

Applicants elect with traverse for three reasons. First, the “species” are not distinct species but alternate techniques that are employed by the current system and may be used together. Second, the “species” are contained in claim 28 and the examiner must examine this claim regardless of the election and it is impossible to elect one species without the others. Third, the “species” require no further search or consideration by the examiner and will not result in any hardship on the Patent Office to examine all of the claims.
